PROJECTS

Learning Management System (LMS) — *Detail*

Developed a comprehensive Learning Management System for managing students, courses, instructors, and learning activities. Implemented course enrolment, student assignment, video-based learning, examinations, payments, and certification modules. Designed video progress tracking and topic unlocking based on course completion. Implemented role-based access, authentication, dashboards, and reporting features.

Handlooms Management System — Detail

Created a centralized Handlooms Management System to streamline product, inventory, agent, and sales operations. Implemented secure user authentication, agent management, billing, stock tracking, and product management functionalities. Integrated barcode generation, product search, and filtering for faster inventory handling. Automated bill and PDF report generation to maintain accurate transaction and business records.
